

I listen to XM radio almost exclusively due to the excellent service, programming and lack of commercials. Commercial radio that is available does not offer the interesting mix of music and news available on XM. I rely on the traffic and weather broadcasts on XM in my sales/marketing position. I respectfully urge you to ABSOLUTELY reject the National Association of Broadcaster's petition 04-160. Why should the NAB have influence over a service that I pay for? If the NAB is threatened by the success of XM, perhaps they should improve their service to compete in our free-market society.
Best regards,

Rob Mooney
